SUMMARY

Business-focused Computer Science graduate with experience in **Zoho CRM, Zoho Projects, Zoho Analytics, Zoho Desk, workflow automation, n8n automation**, and business process mapping. Skilled in understanding business requirements, designing workflows, presenting SaaS solutions, and supporting customer-focused processes. Interested in **Presales, Sales, and Technical Support** roles in the Zoho ecosystem.

EDUCATION

Kamarajar Government Arts College

Bachelor of Science, Computer Science

CGPA: 8.06 / 10.0

Tenkasi, Tamil Nadu, India

2020 – 2023

TRAINING & EXPERIENCE

Information Specialist Analyst – Tata Consultancy Services (TCS)

Jul 2024 - Dec 2024

- Worked on **NielsenIQ** market and product-related datasets involving American retail products.
- Prepared, cleaned, and validated product data according to client guidelines and quality standards.
- Verified product information, corrected inconsistencies, and standardized data to ensure **data accuracy**.
- Followed **Standard Operating Procedures (SOPs)** while meeting daily productivity and quality targets.

Zoho Schools for Graduate Studies – Business Studies

Feb 2026 – Jun 2026

- Learned **Sales, Presales, Customer Support**, SaaS workflows, and customer interaction concepts.
- Worked with **Zoho CRM, Zoho Projects, Zoho Analytics, Zoho Creator, Zoho Desk, Zoho Campaigns, Zoho Backstage, and Zoho Sign**.
- Practiced **Workflow Automation, Blueprint Design, Business Process Mapping**, product demonstrations, and solution mapping.
- Explored **APIs, Automation** using AI, integrations, and automation concepts across business applications.
- Delivered presentations on **Product Workflows, Business Use Cases**, and SaaS solution value.

BUSINESS & ANALYTICAL SKILLS

- **Requirement Understanding:** Requirement gathering, business needs analysis, user needs analysis, solution mapping.
- **Process & Workflow Mapping:** Business process mapping, workflow structuring, use cases, flowcharts.
- **CRM & SaaS:** Zoho CRM, lead management, deal tracking, pipeline tracking, workflow automation, blueprints.
- **Sales & Presales:** Product demonstrations, solution positioning, customer engagement, basic objection handling.
- **Support Workflow:** Zoho Desk ticket management, SLA concepts, issue prioritization, support lifecycle.
- **Automation:** Zoho workflows, blueprints, Automation.
- **Data Analysis:** Dashboards, reports, visualization, trend analysis, business insights.
- **Technical Skills:** Python, SQL fundamentals, MongoDB fundamentals, HTML, CSS, APIs, webhooks, machine learning concepts.

SOFT SKILLS

Communication | Customer Handling | Stakeholder Interaction | Problem Solving | Presentation | Team Collaboration | Analytical Thinking

CERTIFICATIONS

Python Programming | Data Science | Machine Learning | AI in Healthcare

PROJECTS

Fruit Export CRM & Operations Workflow

Zoho CRM | Zoho Projects | Automation

- Designed CRM workflows for **lead management**, **deal tracking**, **quotations**, **customer follow-ups**, and export operations.
- Configured **workflow automation**, **blueprint stages**, **custom fields**, **reports**, and email templates.
- Explored **automation** for CRM-to-project workflow, webhook triggers, deal stage actions, and task notification flow.

Zoho Projects – Customer Onboarding Workflow

Zoho Projects

- Created a customer onboarding workflow after deal closure using **phases**, **tasks**, **subtasks**, and assignments.
- Configured project task notifications and explored workflow automation for project progress tracking.
- Learned task ownership, dependencies, project lifecycle, and operational workflow management.

Zoho Analytics – Healthcare Insights Dashboard

Zoho Analytics

- Imported healthcare datasets and built **dashboards**, **charts**, **reports**, and KPI views.
- Analyzed healthcare **trends** and presented business insights through visual reports.
- Explored report **customization**, **dashboard sharing**, and **data-driven decision-making** concepts.

Zoho Backstage – Event Management Platform

Zoho Backstage

- Explored **event creation**, **registrations**, **ticketing**, **attendee management**, and event promotion workflows.
- Studied **event websites**, **session scheduling**, **speaker management**, **attendee communication**, and engagement capabilities.
- Explored **event analytics**, **integrations**, **customization features**, and automation concepts for managing **physical**, **virtual**, and **hybrid events**.

Zoho Campaigns – Email Marketing Workflow Exploration

Zoho Campaigns

- Explored **Contact Management**, **Mailing Lists**, **Campaign Creation**, and email marketing workflows.
- Learned **Audience Segmentation**, **Email Template Design**, **Subscriber Management**, and campaign setup concepts.
- Studied **Campaign Analytics**, **Open Rate Tracking**, **Click-Through Analysis**, **Email Delivery Metrics**, and marketing communication best practices.

AC Service Ticket Management System

AI-Assisted Web App

- Developed a ticket management prototype for customer complaints and service requests.
- Designed admin and technician workflows for ticket assignment, status tracking, and service management.
- Demonstrated customer support workflow, operational tracking, and service process automation.

Healthcare ICP Intelligence Platform

AI-Assisted Application

- Developed an AI-assisted platform for **Ideal Customer Profile** discovery in the healthcare industry.
- Used company, industry, location, and business profile details to generate customer insights.
- Supported lead qualification, customer targeting, and business development activities.

WebPulse Monitoring Platform

AI-Assisted Website Monitoring

- Developed a website monitoring platform for tracking availability, performance, and content changes.
- Implemented alert mechanisms to notify users about website updates and important changes.
- Demonstrated understanding of monitoring, incident detection, and technical support concepts.

Machine Learning & Analytics Projects

Python

- Built **Chronic Kidney Disease Prediction** and **Store Sales Prediction** models using healthcare and retail datasets.
- Performed data cleaning, preprocessing, EDA, visualization, feature selection, and model evaluation.
- Analyzed **PhonePe** and **Airbnb** datasets to identify trends, patterns, dashboards, and business insights.

Zoho Product Demonstrations – Multi-Product Use Case Presentations

Zoho

- Delivered presentations on Zoho products, business workflows, and SaaS use cases during Zoho Schools training.
- Demonstrated **CRM workflows**, **project management processes**, **analytics dashboards**, and solution concepts.
- Presented business problems, solution approaches, workflows, and product value propositions.
